Technische Daten Kugelhahn • technical data ball valve

Material

Gehäuse: Edelstahl 1.4408
 Kugel: Edelstahl 1.4408
 Kugeldichtung: TFM 1600
 Schaltwelle: Edelstahl 1.4401
 Schaltwellen-
dichtung: PTFE

material

body: stainless steel 1.4408
 ball: stainless steel 1.4408
 ball seal: TFM 1600
 stem: stainless steel 1.4401
 stem seal: PTFE

Temperaturbereich

- 20° C bis + 180° C
 (abhängig vom Betriebsdruck)
 Achtung: Temperaturbereich des Antriebs beachten!

working temperature

- 20° C to + 180° C
 (depending on working pressure)
 note: temperature range of the actuator!

Verwendung

Öle, Druckluft, Wasser, Dampf, Lösungsmittel, Kraftstoffe,
 aggressive Medien

suitable for

oils, compressed air, water, steam, solvents, fuels,
 aggressive mediums

Bemerkungen

Druck-Temperaturdiagramm siehe Datenblatt Kugelhahn

remarks

Pressure Temperature Chart acc. to data sheet ball valve

Technische Daten Drehantrieb • technical data actuator

Material

Gehäuse: Aluminium eloxiert
 Welle: Stahl, chemisch vernickelt
 Kolben: Aluminium
 Dichtungen: Perbunan

material

body: aluminium anodized
 shaft: steel nickel plated
 piston: aluminium
 seals: perbunan

Temperaturbereich

- 20° C bis + 70° C

working temperature

- 20° C to + 70° C

Steuermedium

gefilterte und geölte Druckluft nach
 Pneurop / ISO Klasse 4

operating media

filtered and oiled air acc. to Pneurop / ISO class 4

Besondere Merkmale

• Direkte Anflanschung von Magnetventilen nach Namur möglich. (Fabrikate: Airtec, Festo, Herion).

Bemerkungen

- geeignet für allgemeine Industrie
- Die Drehantriebe sind so bemessen, dass ein Mindeststeuerdruck von 6 bar bis max. 10 bar erforderlich ist.
- Bei nichtschmierenden Medien (z. B. Wasser) und bei längerer Stillstandzeit des Hahnes ist es möglicherweise notwendig, den nächst größeren Antrieb zu verwenden. In diesem Fall bitten wir um Rücksprache.

special features

• Direct mounting of magnetic valves per Namur is also possible. (Brands: Airtec, Festo, Herion).

remarks

- suitable for industrial purposes
- The actuators are designed for air supply of 6 bar up to 10 bar.
- For non-greasing mediums (e. g. water) or/and long non working time it's might be necessary to choose a bigger actuator size. In this case please contact our technical staff.
